6. (previously Amended) A method for allowing a user to provide personalized prompts associated with communication management options presented by a first interactive voice response service on behalf of the user, the first interactive voice response service for responding to calls to the user, the method comprising the steps of:

maintaining help information respectively associated with the communication management options on a device connected to the first interactive voice response service via the internet, the help information for assisting the user in providing personalized prompts associated with the communication management options;

receiving an option selection from the user via a network interface;  
retrieving the respective help information associated with the selected option, said help information including textual descriptions of the selected option for display on a graphic user interface;

providing the respective help information to the user via the network interface;  
maintaining access codes respectively associated with the communication management options, the access codes for allowing the user to record personalized prompts via a second interactive voice response service, the second interactive voice response system for controlling how the first interactive voice response service responds to calls to the user;

retrieving the respective access code associated with the selected option; and  
providing the respective access code to the user via the network interface.
